

DESE and WGBH Partnership for Educational Resources

illuminating Earth over a Year

Observable Patterns

Like you, most people experience about 365 days and nights and different seasons each year. Many locations on Earth have winter seasons and fall seasons. These observed seasonal patterns happen in both the northern and southern hemispheres.

Take Notes

DEEP DIVE

Using Interactive Lessons

Webinar for Elementary School Educators

[Deep Dive: Interactive Lessons for Elementary Grades](#)

[FREE Webinar for MA Elementary School Educators](#)

[Thursday, May 7 at 7:00 PM ET](#)

[Interactive Lessons](#) are tailor-made for engaging students in standards-based distance learning. Join educator-presenters for an in-depth look into how you can use Interactive Lessons with your elementary school students, whether you are face-to-face or virtual. There will be ample time for Q&A.

Webinar Objectives:

- Understand the pedagogy and functionality of Interactive Lessons
- Preview the range of Interactive Lessons on [PBS LearningMedia](#) offerings for elementary school instruction
- Hear tips from elementary school educators experienced with Interactive Lessons

[Register Now](#)

Feel free to share this invitation with your colleagues. Please [register](#) as space is limited. A Certificate of Completion will be awarded to all who attend the live stream and complete a brief survey. The on-demand recording link will be sent to all registrants.

Explore our Distance Learning Center

WGBH's [Distance Learning Center](#) is here to support teachers, students, and families. We've curated assignable, self-paced, and self-contained lessons and activities from PBS LearningMedia and early childhood education libraries. These resources are easy to use and minimize the need for logging in, hands-on guidance, or group work.
