

Technology Support During School Closure

During this period of online learning, we've opened up our technology help desk to the students. By visiting this link <http://helpdesk.warehamps.org/open.php> you can access an online ticket system to report any technical issues your child might be having with their Chromebook, home WiFi, or online learning website.

You can also get access to the ticket via the school website under Students and Parents>Student Help Desk.

The online ticket, once created, will be sent to someone in the Wareham Public Schools technology department. A member of their team will follow up and do their very best to help assist in the issue that is being reported.

Thank you all for your continued support.
