Learn about three options that help prepare students for college with the potential to earn college credit while still in high school!

AP Night

6:00 – 6:30 PM

If you're interested in learning more about AP classes at Wareham High School and the benefits they offer to college bound students, this presentation will help answer any questions you have.

Students who take AP classes are better prepared for college and through AP testing often qualify for college credit. In general, some of the benefits include:

- Standing out in the college admissions process
- Skipping introductory college classes
- Earning college credits
- Building college-readiness skills

What type of student should take AP classes? There is no one answer, but the following traits or achievements often correlate with AP course success:

- PSAT scores that indicate potential (AP Potential Tool)
- Curiosity
- Commitment
- Creativity
- Academic Preparedness
- Motivation

To learn more, come to the WHS Auditorium on the 8th at 6:00PM.

Dual Enrollment Night

6:30 7:00 PM

Dual Enrollment provides the opportunity for high school students who qualify to enroll in local college courses while still in high school. Students who participate receive both high school and college credits.

Why consider dual enrollment? The benefits are many, but some things to consider are that dual enrollment allows students to

- Earn college credits while still in high school
- Experience early exposure to college life and get a head start on the transition from high school to college
- Save \$\$\$\$ and accelerate earning a college degree
- Experience new meaningful and challenging academic and social experiences
- Achieve a higher rate of college completion
- Earn grades/credits that are transferable to most colleges and universities

Some area colleges also offer a free course or reduced tuition rates for dually enrolled students; each college has a unique policy, however.

To learn more, please attend an informational presentation immediately following the AP Night presentation in the auditorium at 6:30PM.

International Baccalaureate Program

Learn about WHS's 3rd option that helps prepare students for college with the potential to earn college credit while still in high school!

IB Night

7:00 – 7:30

The International Baccalaureate Diploma Program is a balanced, internationally-minded, and thought-provoking curriculum programme that encourages the intellectual, emotional, and physical well-being of all students.

The Diploma Program- a two year program - is open to all students who qualify for junior level classes. Through these classes, students will:

- have excellent breadth and depth of knowledge
- flourish physically, intellectually, emotionally and ethically
- study at least one language
- excel in traditional academic subjects

Students who take at least one, or more, Diploma Program classes are eligible for college credit, and research has shown that students who take DP courses are admitted more often to selective institutions, and tend to perform better in their post-secondary studies, including higher rates of post-secondary completion.

Students who seek a less traditional route to learning would excel in the Diploma Program. This means students who have motivation to take ownership of their learning, are curious about the world around them, are creative, and committed, would do well in this type of class.

For more information, please attend our Program Information Night in the auditorium at 7:00PM
